

QuikMetrix in Healthcare

Industry: Healthcare | Senior Living & Care

Business Profile

Industry: Healthcare | Senior Living & Care

Organization: Six (6) Communities located in Illinois, Indiana, and Florida.

Business: Providing seniors and their families independent living, rehabilitation, assisted living, memory care, residential nursing and personal assistance.

The Challenge

Delivering accurate and timely information throughout the organization for compliance reporting and crucial decision making.

The Results

Following QuikMetrix implementation:

- Increase in employee productivity
- Decrease in reporting costs

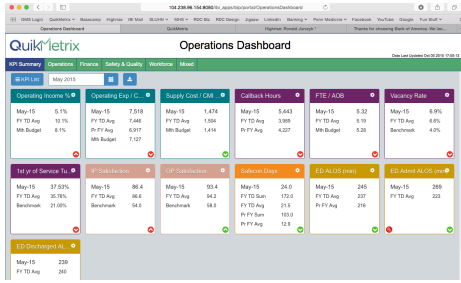

Business

This organization which serves seniors and their families, has six communities located in Illinois, Indiana and Florida. In 2017, the organization is celebrating it's 125th year of providing independent living, rehabilitation, assisted living, memory care, residential nursing and personal assistance services in the communities they serve.

Challenge

To satisfy organizational reporting requirements, an enterprise process to produce multiple Key Performance Indicator (KPI) reports for management and the board of directors (BOD) had been implemented. The KPI reports were Excel based and required an extensive manual process that was time and resource intensive to produce. Additionally, the information was error prone, was subject to a high degree of data latency and furthermore had limitations in the distribution of the information.

Key Features

User Specific Customization

- Each user customizes their portal page for the measures they need to monitor.
- Each user can tailor their view of how to display the data for each "Portlet View"
- Drill to Detail is included
- Full Print to PDF of the Visuals
- Export to Excel for the Data

Key Benefits

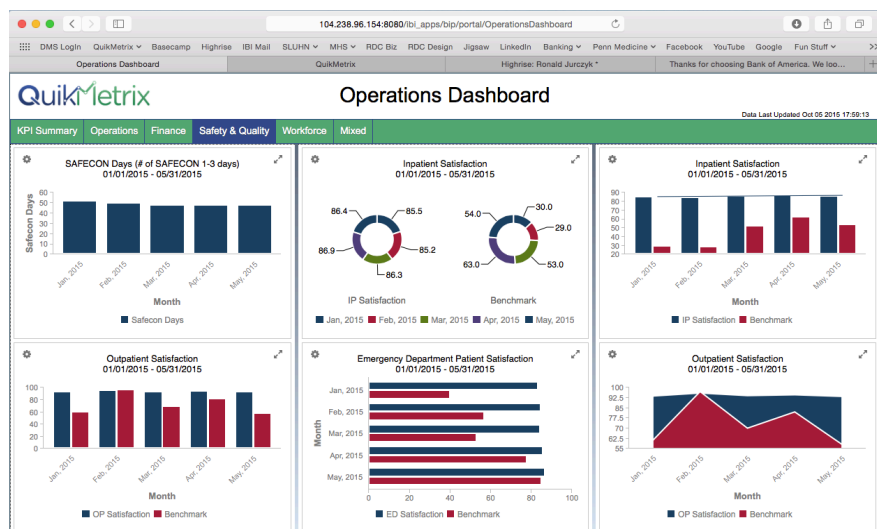

- QuikMetrix is a configurable portal "accelerator"
- No application development required
- Fully Functional Business Intelligence application delivered in weeks

Solution

QuikMetrix was the answer to address the challenges the organization was facing. Within a matter of weeks, the QuikMetrix portal was configured, delivering a fully functional business intelligence application for displaying, charting and drilling of metrics, measures and key performance indicators (KPI's) without requiring application development.

Results

Since the "go live" with QuikMetrix, the organization has experienced no maintenance to keep the application operational. The organization has been able to reallocate it's staff to other organizational priorities with the elimination of the manual effort to produce the KPI reports. QuikMetrix has improved data accuracy for the organization and most importantly - crucial decisions are now being made with current data not last week's figures or outdated numbers.
